

Even though this was a busy month, some events stood out as special and I am not just talking about the Hurricane! It did however give us a bumpy start to the month, arriving on the 6th and 7th of the month. I added a few pictures to show how well Sandy and her team got us through Hurricane Dorian! She did an outstanding job! The first picture showed the low lake level in preparation of the expected heavy rains. Then the second picture showed the same area several hours later. In the background of the second picture, on the grass, you can see an orange hose draining the water from the street into the lake. That pump in the corner of the first picture is what pumped the water through that hose. Great job!!!!

The rest of this newsletter has to do with who and what we are as a community! Life is like a sea saw, and we have to roll with the punches. The bottom line is we have each other and we have our belief in God. It just happens that this month we were able to be with our sweet neighbor, Doris, to remember her husband, Charles, on the anniversary of his passing two years ago. Then at the end of the month, we were able to celebrate her 92nd birthday!

*Happy Birthday To You, Doris!!*
