

Well, I hope everyone is doing well, considering what is going on around us. It is "tell tale" for us, when the only exciting things going on are routine medical appointments and grocery shopping! Our July 4th celebration was done by watching celebrations on TV, and the golf cart parade as they drove past our house. I am not complaining. As I write this Newsletter, we are waiting for Hurricane Isaias to reach us!! This kind of excitement I could do without, completely.

I am trying to decide how to proceed with this news letter, considering what I have for current events and the photos in the latter part of 2003? So, I will use the few current pictures I have and then move on to and finish 2003. Lets see what happens?

How do you like our rainbow behind our house? I think I caught one a couple of years ago also. As for the clock, that was at 9:54AM. Now look at the thermometer!!!

The Museum presentations in Conway have started up again on Wednesdays & Saturdays. This was on local fossils. We don't look for them, but some people do.

Happy 4th of July!!

2003 RV Pictures

When our RV Group would get together, we would do something interesting together. At *Pharr, TX* we spent some time at the beach. As you can tell it was too chilly to take our cloths off!!!

Sometimes we traveled with a few other members of our group, which we did in *Mobile, AL*. These pictures were taken at the USS Alabama Battle Ship Memorial Park. At the bottom, a couple of us were testing out the sleeping arrangements on board ship.

2003 RV pictures

The final choice is *St Ignace, MI*. Naturally, we visited *Mackinac Island*, a rather unique experience! A fun place to visit! Motorized vehicles are not allowed on the Island. That leaves walking, bicycles, and horse & carriage. We also visited the canal near by in *Sault Ste Marie*. We were there with the Goldman Family, with whom we have become quite close..
